

The Art & Design Technology Treasure Hunt Activity

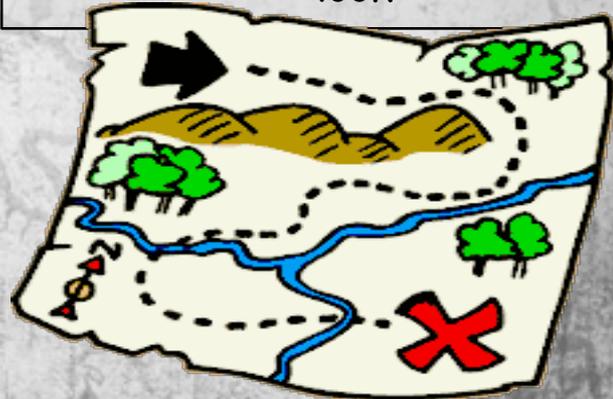

Your task is to design a treasure hunt using your local area! Research Treasure Maps on the internet to get some ideas for how you might present your own map design.

Plan your route. Create a map of your local area and begin the treasure hunt starting at your home and plotting out your journey to find your secret treasure.

The start could be your house, your garden or from a local shop. Just be sure to define the treasure hunt boundaries, so all your treasure hunters don't get lost.

You could draw your map and then bring it to life with colour and illustrations to highlight different locations and features of the area you live in. On A4 paper sketch a few alternative ideas for how your map might look

You should include in your treasure hunt:

- The treasure! What are we hunting for?
- Design a box that the treasure will be hidden in. Will it be decorated? What material is it be made from?
- You will need a bag. What kind of bag is most suitable? A backpack, a suitcase, a handbag...? Think about what equipment you might need to carry. Should it be camouflaged or stand out so you don't lose it?
- You will need food for your journey. Will you plan a meal to take? Create a list of supplies or choose a place to collect food along your treasure hunt?
